About Project

We are building the next gen RWA, which is based on the real Oil Production. $FRACT is based on Polygon network.

Consistently growing profit

The hydraulic fracturing equipment market is highly profitable, and our company has tripled profits yearly for three years.

Token buyback mechanics

$FRACT token is going to be inflationary, because of planned buyback procedure based on company net profits

Sustainable sphere

The oil industry is one of the most stable and profitable in the world! The oil industry is one of the most stable and profitable in the world!

RWA Token

A key player in the real-world assets ecosystem, secured by an existing and fully operating scientific-production base.

Environmentally friendly

We are actively developing equipment for Intelligent Well Completion to optimise resource use and reduce greenhouse gas emissions.

Growth 25X

According to Gordon's formula, institutional investors assess stock capitalisation growth in absolute terms using pessimistic forecasts.

Innovative Technology

Our cutting-edge technology in hydraulic fracturing ensures maximum efficiency and safety, setting new industry standards.

Global Partnerships

We have established strategic partnerships with leading companies worldwide, enhancing our market reach and operational capabilities.
